

ROB HOLMER, PE, GE

Rob Holmer is the Sacramento Branch Office Manager and Principal Engineer with Neil O. Anderson & Associates, Inc., (NOA).

As the author of nearly 1,000 geotechnical reports, Rob is a geotechnical expert in residential, commercial, and industrial development. He specializes in development on steep slopes, deep foundation systems, expansive soils, compressible soils, construction and permanent dewatering, soil stabilization techniques, and expert forensics investigations.

Rob earned a Bachelor of Science in Civil Engineering and a Masters Degree in Civil Engineering. He is a registered Civil and Geotechnical engineer. Rob serves on the Board of Directors for the California Geotechnical Engineers Associates. He participates in the development and grading of the geotechnical engineering license examination with the California board of Professional Engineers and Land Surveyors. Rob also publishes a semi-monthly article in *Pool and Spa News* magazine presenting case histories of swimming pool failures.

If you feel Rob can help meet your current needs please give him a call.
