

# School Site Acquisition: Task Integration is the Key

A quick look at the integrated site acquisition process

At Neil O. Anderson & Associates (NOA), we see school site acquisition as one continuous process.

Our years of experience have given us the ability to view this process as it really is--not as a daunting list of unrelated tasks, but as one seamless whole.

The chart to the right illustrates how CEQA, Geotechnical, CDE, and DTSC requirements connect together at various stages of the site acquisition process and achieve the common end of bringing your site acquisition project to completion.

Why struggle with multiple consultants when a single company can provide it all? From the initial feasibility study to occupancy of the site, NOA is your school site acquisition solution.
